Application/Control Number: 10/625,459

Art Unit: 1732

1.Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Page 2

In the independent claims, applicant recites that the apex, the first end point and a first base point are coplanar and "form a continuous edge from the first base point to the apex". First of all, it is not clear exactly what the first base point is—is this a point anywhere along the base aperture? It would appear that the formation of a plane containing a first end point along the middle aperture, the apex and any point along the base aperture would indeed form a plane. However, it is not clear that such a plane would have "a continuous edge from the first base point to the apex" as recited in the claims. Technically, a plane does not have an edge but continues on indefinitely into space. Clarification is required as to exactly what the first base point is and what the continuous edge containing this point and the apex are. Also, claims 5-20 are indefinite for failing to explicitly set forth any steps as to the method in question. le, while "forming" may be interpreted as a step, it is not clear from the claims exactly how this is being done and hence the claims are indefinite. Applicant should insert actual process language as to how the retroreflective sheeting, prism and casting mold are actually formed, rather than relying on the shape of these structures for patentability. These are method claims, not product or structure claims.

2.Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Application/Control Number: 10/625,459 Page 3

Art Unit: 1732

Upon close review of the claims, a 112 issue manifests itself with respect to the instant first base point and its formation of a "continuous edge" with the instant apex. Also, claims 5-20 should set forth steps that show how the items are actually formed. An obviation of the 112 issues would place the application in condition for allowance.

3.Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mathieu D. Vargot whose telephone number is 571 272-1211. The examiner can normally be reached on Mon-Fri from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Johnson, can be reached on 571 272-1176. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
